Re: documentation of use of Little Vermilion River as a fishery

On August 16, 2000 and October 18, 2000 Illinois EPA personnel conducted a reconnaissance of the Little Vermilion River downstream of the former Matthiessen and Hegeler property to document the use of the river as a fishery. On the August visit, Robert Casper photodocumented the presence of a fishing bobber along the shores of the river (see Photo 1 on following page). On the October visit, Robert Casper photodocumented the presence of fishing line along the shores of the river (see Photo 2 on following page).
